

WASH BOOTH Systems

Contained Cleaning Systems for Pressure Washing and Pre-Treatment Applications

JRI Cleaning Systems offers a full line of wash booths for pressure washing applications. These versatile systems can be built to almost any size to accommodate your individual needs. Two types of collection tank designs are available for moderate or light solids applications. The center drain design directs solids into an easy access sump for solids removal. For low solids applications such as phosphating or other types of metal pretreatment an open tank design is used. Add your own wastewater recycling or sewer discharge system and you have a system for indoor or outdoor contained cleaning.

Options:

- Manual and powered turntables
- Ramps and walls
- Exhaust systems
- Stainless steel oil skimmers
- Covered tops and curtains
- Work lights

Custom Wash Booths

Let JRI Cleaning Systems custom build to your design or specifications. Contact us for more details on our drive on wash booths.
