For Normal Strength Wastewater

**For 1 Billion CFU/gram**

1\(^{st}\) Week = 25 lb for every 750,000 gallons every day  
2\(^{nd}\) Week = 25 lb for every 750,000 gallons every other day  
3\(^{rd}\) and 4\(^{th}\) Week = 25 lb for every 750,000 gallons per week

**For 5 Billion CFU/gram**

1\(^{st}\) Week = 5 Lbs for every 750,000 gallons every day  
2\(^{nd}\) Week = 5 Lbs for every 750,000 gallons every other day  
3\(^{rd}\) and 4\(^{th}\) Week = 5 Lbs for every 750,000 per week.

**For 10 Billion CFU/gram:**

1\(^{st}\) Week = 2.5 lb for every 750,000 gallons every day  
2\(^{nd}\) Week = 2.5 lb for every 750,000 gallons every other day  
3\(^{rd}\) and 4\(^{th}\) Week = 2.5 lb for every 750,000 gallons per week.

**For High Strength MAINTENANCE**

Need to evaluate if the 4\(^{th}\) week dosage is appropriate. In most cases, a weekly dosage of 1-2 lb may be necessary depending on influent.
